

# RUN THE APPLICATION :

```
(base) F:\Projects\Breast Cancer\Main\Flask>python app.py
```

```
Instructions for updating:  
Use tf.where in 2.0, which has the same broadcast rule as np.where  
Model loaded. Check http://127.0.0.1:5000/  
* Debugger is active!  
* Debugger PIN: 257-358-499  
* Running on http://127.0.0.1:5000/ (Press CTRL+C to quit)
```

Breast Cancer Detection

localhost:5000/#section2

## Detect the Tumor in the Breast

Drop in the scan for prediction.

Upload your image

Choose...

Prediction: It is a malignant tumor... Please Consult Doctor
